

Contents

1. Tailings facilities – an introduction
2. Existing mineral processing methods with special emphasis on tailings production and water management
 - 2.1. Processing of sulphidic ores
 - 2.2. Processing of precious metal ores
 - 2.3. Uranium ore processing practice
 - 2.4. Phosphates processing
 - 2.5. Coal preparation
 - 2.6. Processing of bauxite ores
 - 2.7. Case studies
 - 2.7.1. Romanian examples of technologies generating tailings
 - 2.7.2. Greek examples for technologies generating tailings
 - 2.7.3. Hungarian examples for technologies generating tailings
- 3 Existing slurry handling, treatment and transport techniques, including dewatering and paste technologies
 - 3.7 Paste and Thickened Tailings Technology
- 4 Existing tailings placement and lagoon and dam design and formation practices
- 5 Existing authorization, management, monitoring and inspection practices
- 6 Environmental impacts of tailings
- 7 Outlook and conclusions
